

Strata 799 – The Alpine Village Information Bulletin

October, 2015

To the owners of Strata 799:

1. There has been much information circulating in the Courtenay/Mt Washington area about proposed fire service plans. Recently the Comox Valley Regional District (CVRD) has updated a web site – adding a number of links with historical and current information. If you are interested in reading any items and/or responding to their requests for feedback, please contact their web at: <http://www.comoxvalleyrd.ca/EN/main/departments/emergency-services/fire-services/mt.-washington-fire-service-project.html>

Strata 799 is well into setting up our Fire Service Plan as approved at the Alpine Village Special General Meeting and is hoping to work cohesively with CVRD. The plan is to set up a well-equipped fire service trailer to be stored in the Sea-Can container that has been placed at the front edge of the main Strata 799 parking lot. With this as a functional beginning the groups can then, over time, build towards a larger fire service.

If you have specific questions or concerns you may contact James Bast, Manager of Fire Services Comox Valley Regional District at: jbast@comoxvalleyrd.ca,

2. Please see the Website Services Link for Grizzly Alpine Services available.
3. Please see the Website Services Link for New Grizzly Alpine Services GARBAGE PICK UP - Sign Up Sheet
4. Please also see the Website Services link wherein Lana has updated the list of contractors that are willing to come to Mount Washington.
5. Please see also the Services Link for New Emergency phone numbers flier.
